

The housing provides top access to the Wendel® projector for installation, relamping and focusing. Servicing from above is required. The bottom of the housing is installed above the ceiling. Each housing comes prewired with a large, accessible junction box. Each complies with Underwriters Laboratory requirements for Non-IC installations.

The Wendel projector is sold separately. The projector's objective cone extends through the ceiling and plaster is applied up to it. The objective cone is field painted to match the ceiling for a near hidden light source.

Wendel housings are supplied with mounting hanger brackets.

## How to Specify

Wendelighting shall specify housing locations. Provide Wendelighting with a to scale Reflected Ceiling Plan and Interior Elevation including art and/or maximum art size or complete a Projector Worksheet found at [www.wendelighting.com](http://www.wendelighting.com). Staff members are also available for jobsite consultation on a fee basis.

## SPECIFICATIONS

<b>Applications:</b>	Unobtrusive Light Source Access Above Ceiling Required
<b>Power:</b>	120 VAC
<b>Lamping:</b>	150 Watt Maximum
<b>Weight:</b>	19 lbs.
<b>Housing:</b>	Die Formed Galvanized Sheet Metal
<b>Mounting:</b>	Hanger Brackets Rigid to Construction
<b>Relamping:</b>	Top Access Panels
<b>Listing:</b>	UL / CUL Damp Location Thermally Protected Non IC / Not Air Tight

### Approximate Location for the Wendel Projector Housing.

In order to specify the approximate location for a Wendel housing, determine the position of the object to be illuminated and see the following formula:

$$P = W + 1/3A + 2"$$

- P = Distance of Wendel projector to wall
- W = Distance from top of art to ceiling
- A = Height of art
- CL Housing = P + 2" (additional 2")

Forward information to Wendelighting to verify location
