Wenlux® Model 415W
Recessed Wash Light

The Wenlux® Recessed Wash Light provides the designer with an option to illuminate tall surfaces. The optics are designed for highest illumination levels to occur at the eye level, where art is most viewed. When the top of art is close to the ceiling, the Wash Light provides an option to handle even this most difficult task.

The Wash Light utilizes an energy efficient MR16 IR Halogen Lamp paired with an Iron-Free Diffusion Glass to cast an even plane of white light across a large area, making it ideal for architectural accent lighting illumination of large art or groupings of art.

The Wash Trim is held in place by positive spring retention, effectively preventing it from shifting position and ensuring that your wash light will remain steadily aimed and secured to the ceiling.

Patent 6,612,0761 B2 - Additional Patents Pending
